

Skill DV — Power BI Report

Stock Market Trend Dashboard | Report Documentation

Overview

This Power BI report (**skill_DV_pbix.zip**) tracks stock/market trading activity over time. It centers on trading **Volume** and **Close price**, layered with **20-day** and **50-day moving averages** to visualize short- and medium-term price trends alongside a date-range slicer and a switchable metric selector.

Report Specifications

Property	Value
Canvas size	1920 × 1080 px (16:9, “Fit to Page”)
Base theme	Fluent 2 (Preview) — Fluent2-CY26SU08
Custom theme	Innovate
Number of pages	1 (configured as a Drillthrough details page)
Number of visuals	5 (2 line charts, 1 column chart, 2 slicers)
Export/interaction settings	Summarized data export allowed · cross-filtering & drill enabled · enhanced tooltips on

Page: “Page 1” (Drillthrough Details Page)

This page is bound as a **drillthrough target**, filtered by **Year** (from DateTable). A user drilling through from a summary page into a selected year lands here to see that year's trend detail.

Visuals on this page

Visual	Type	Fields Used	Layout Position
Trend — Close & Moving Averages	Line chart	Category: Date (Year → Quarter → Month → Day) Values: Count of Close, 20_day_moving, 50_day_moving	top-left
Trend — Moving Averages	Line chart	Category: Date (Year → Quarter → Month → Day) Values: 20_day_moving, 50_day_moving	top-center
Date Range	Slicer	Field: Date (ascending, between-range slicer)	top-right
Metric Selector	Slicer	Field: AVG_METRIC (switches which measure the visuals plot)	bottom-left
Volume by Period	Column chart	Category: Date (Year → Quarter → Month → Day) Values: Count of Volume	bottom-center

Data Model — Fields Referenced

Field names below are as referenced directly by the report's visuals (extracted from the report definition). The underlying table schema and DAX measure formulas live in the compressed data model inside the .pbix and aren't included in this summary.

Table	Field / Measure	Role
DateTable	Date	Date column; exposed via a Year → Quarter → Month → Day hierarchy
DateTable	Year	Used as the drillthrough filter field for this page
(fact table)	Count of Volume	Aggregated measure — trading volume per period
(fact table)	Count of Close	Aggregated measure — closing price per period
(fact table)	20_day_moving	Calculated measure — 20-day moving average
(fact table)	50_day_moving	Calculated measure — 50-day moving average
(parameter table)	AVG_METRIC	Field parameter used to let the metric selector slicer switch measures

Notes for the GitHub Repo

- This PDF documents the report's structure (pages, visuals, fields, theme) directly from the .pbix file — it's a text-based reference, not a pixel-rendered screenshot of the live charts.
- For a visual preview image in the repo, open the .pbix in Power BI Desktop and export *File* → *Export* → *Export to PDF* (or take a screenshot) — that will capture the actual rendered charts with live data, which this environment can't render directly.
- The report contains two identical registered image resources (Screenshot_2026-09-25_...png) used as a decorative theme background graphic, not a data screenshot.
